## EDUCATION

### Acropolis Institute of Technology and Research

*Bachelor of Technology in Computer Science and Information Technology*

Indore, M.P

2022 – 2026

## EXPERIENCE

### Software Development Engineer Intern

Feb 2026 – April 2026

*Appzeto*

*Indore, M.P*

- Engineered and maintained scalable RESTful APIs using Node.js, Express.js, and MongoDB to support web and mobile application features.
- Optimized MongoDB schema design and API query performance, reducing response time by 30–40% and improving overall backend efficiency.
- Architected and deployed reusable middleware for robust validation, centralized error handling, and secure authentication, enhancing code maintainability by 40% and application security.
- Implemented logging and debugging workflows to monitor API latency, uptime, and error handling, improving troubleshooting efficiency by 30%.
- Collaborated using GitHub-based version control and deployment workflows, improving development productivity and code maintainability.

## PROJECTS

### NowStay (Online Hotel Booking) | *GitHub* | *React, Node.js, Express, MongoDB*

March 2026 – Present

- Developed a full-stack hotel booking platform using the MERN stack with responsive architecture supporting 15+ core booking features.
- Implemented a seamless 4-step booking workflow including date selection, room selection, plan selection, and secure online payments.
- Designed a real-time inventory and pricing management system, reducing manual data processing time by 40%.
- Integrated Razorpay payment gateway, OTP authentication, and Cloudinary media storage to improve platform security and user experience.

### Chat-Application | *GitHub* | *React, Express, MongoDB, Socket.io*

October 2025

- Built a real-time chat application using MERN stack and Socket.IO supporting instant one-to-one and group messaging.
- Implemented live online/offline user status updates with real-time synchronization similar to WhatsApp.
- Integrated JWT authentication and bcrypt encryption to secure user login, registration, and protected routes.
- Optimized MongoDB data handling and Cloudinary image storage for efficient chat and media management.

## TECHNICAL SKILLS

**Languages:** C++, HTML, CSS, JavaScript

**Frontend:** React, React Router, Axios

**Backend:** Node.js, Express.js, REST APIs, JWT Authentication, bcrypt

**Realtime Tech:** Socket.IO

**Databases:** MongoDB, Mongoose

**Miscellaneous:** Linear (DSA), Object-Oriented Programming (OOPs)

**Dev Tools:** GitHub, VS Code, Postman, Cloudinary, Render, Vercel,

## ACHIEVEMENTS

- Participated in Coding Ninjas “Slayground Challenge 2.0” with and focusing on data structures and algorithm optimization.
- Secured 3rd place in Minor Project Exhibition at college level.
- Completed CodeChef “C++ Basics” course focused on programming fundamentals and algorithms using C++.

## CERTIFICATIONS

- NPTEL: Programming in Java — Certified.
- Department Workshop (Yuvantar): GitHub, HTML and CSS — Certificate of Completion.
- Full-Stack E-Commerce Project — Certificate of Completion.
